SPIRALES

FREE PLATINUM SPIRALES

BALT's spirales are composed of a fine platinum wire. They are designed for intravascular use in neuroradiological of peripheral zones, for the treatment of arterio-vascular malformations and aneurysms. Three ranges of coils are available: free platinum spirales with or without fibers, and Flow Coils.

SPI & CIRRUS Ranges

The free radiopaque spirales, with or without fibers, are put on a straightening mandrel enabling an easy introduction into a catheter.
